

ACCUMULINK™ ADVANCE

The Accelerated Death Benefit Rider

The Accelerated Death Benefit Rider, available for an additional cost on AccumuLink Advance registered index-linked annuity, provides a guaranteed death benefit that offers additional growth potential.

The 6% Roll-up (compounded daily) feature allows your death benefit to grow even in years when your contract value doesn't. This value accumulates every day until you reach age 85 (assuming no withdrawals), up to a maximum of 200% of your contract value.¹

The Accelerated Death Benefit provides an "acceleration" feature that can help cover you if your health changes.

With this rider on AccumuLink Advance, if you experience a permanent change in your health you can accelerate your death benefit. This feature provides full access to your death benefit value while you're still living, and flexibility on how to spend the proceeds.

Not a deposit – Not FDIC/NCUA insured – Not insured
by any federal government agency – Not guaranteed
by any bank or credit union – May go down in value

Insurance products issued by:

Minnesota Life
Insurance Company

After a 30-day waiting period, the acceleration feature may be available, based on certification of a permanent “qualifying event” (after a 90-day elimination period, which can run concurrently with the waiting period). Please refer to the current AccumuLink Advance prospectus for any state variations that may apply.

Once your benefit is accelerated, the contract value is increased to the death benefit value. You can then take withdrawals without incurring any charges.² And spend your benefit at whatever pace and however you choose (including but not limited to):

1. The maximum is based on contract value, which can grow based on interest earned, or decline due to rider charges. As a result, once your death benefit reaches the maximum, it may fluctuate up or down as your contract value changes.
2. Surrender charges are waived during the Acceleration Period. However, withdrawals during the Acceleration Period have the same tax consequences as any other withdrawal. You should seek assistance from your personal tax advisor. Upon acceleration of the death benefit, the 6% Roll-up Value stops increasing.

HOW THE 6% ROLL-UP AND DEATH BENEFIT ACCELERATION WORK

This hypothetical example is for illustrative purposes only. It is not indicative of any particular time period or guarantee of future performance.

The Accelerated Death Benefit Rider is not long-term care insurance. It is not a qualified benefit under the Internal Revenue Code. An individual may not purchase this optional death benefit rider if they are currently in a nursing home, skilled nursing facility or unable to perform any one of the six ADLs. The Accelerated Death Benefit Rider provides an option to accelerate death benefit proceeds in the event that the owner becomes chronically or terminally ill. (You should consult the application for eligibility criteria.)

Withdrawals or surrender of contract value during the acceleration period will be subject to taxation in the same manner as any other withdrawal. (You may wish to consult your tax advisor before electing to accelerate your benefit.)

What is a qualifying event?

A qualifying event is one of the following permanent conditions, certified by a licensed health care practitioner:

Chronic illness, where one is either (a) unable to perform at least two of six activities of daily living, or (b) has severe cognitive impairment.

Activities of daily living (ADLs) refer to basic functional abilities that ensure the ability for self-care and ability to live independently without substantial assistance from another individual.

The six ADLs are: bathing, continence, dressing, eating, toileting and transferring. Severe cognitive impairment is the deterioration or loss of intellectual capacity, requiring substantial assistance by another person to protect you from threats to health and safety.

Terminal illness, where one has a terminal condition which results in a life expectancy of 12 months or less.

An annuity is intended to be a long-term, tax-deferred retirement vehicle. Earnings are taxable as ordinary income when distributed, and if withdrawn before age 59½, may be subject to a 10% federal tax penalty. If the annuity will fund an IRA or other tax qualified plan, the tax deferral feature offers no additional value. Qualified distributions from a Roth IRA are generally excluded from gross income, but taxes and penalties may apply to non-qualified distributions. Please consult a tax advisor for specific information. There are charges and expenses associated with annuities, such as surrender charges (deferred sales charges) for early withdrawals.

Registered index-linked annuities are subject to ongoing fluctuations in value, and it is possible to lose a significant amount of principal due to negative index performance or a negative interim value adjustment.

All guarantees provided under this contract, including optional guaranteed death benefits, the crediting of any index credits earned at the end of a crediting period, interest, and annuity payments are subject to the financial strength and claims-paying ability of Minnesota Life Insurance Company. The guarantees have no bearing on the performance of any index that underlies an indexed account.

Fees for optional benefits will be deducted from your account value, and if deducted prior to the end of a multi-year crediting period, will reduce the amount of index credits you may receive at the end of a crediting period.

We reserve the right to limit or discontinue acceptance of future purchase payments after the contract is issued. This may limit the ability to increase the contract value through additional purchase payments. If an optional benefit is elected in the contract, this may also limit the ability to increase the value used to calculate the optional benefit.
