2. Term Guarantee accounts are only available for allocation at contract issue. No transfers may be made into this account after contract issue.

An annuity is intended to be a long-term, tax-deferred retirement vehicle. Earnings are taxable as ordinary income when distributed, and if withdrawn before age 59½, may be subject to a 10% federal tax penalty. If the annuity will fund an IRA or other tax qualified plan, the tax-deferral feature offers no additional value. Qualified distributions from a Roth IRA are generally excluded from gross income, but taxes and penalties may apply to non-qualified distributions. Please consult a tax advisor for specific information. There are charges and expenses associated with annuities, such as surrender charges (deferred sales charges) for early withdrawals.

Guarantees are subject to the financial strength and claims-paying ability of the issuing insurance company.

Some products and optional features may not be available in all states and features may vary by state. Not all products, features and optional benefits are available from all firms.

The applicable rates (caps, participation, trigger, etc.) for the initial Crediting Period are shown in the contract at issue. For each subsequent Crediting Period, rates will be declared at the beginning of the Crediting Period and will be guaranteed for the duration of the applicable period. Rates are subject to the maximums and/or minimums as stated in the contract.

The SG Climate Prepared Index (the "Index") is the exclusive property of Société Générale and its affiliates (collectively, "SG"). Société Générale has contracted with S&P Opco, LLC (a subsidiary of S&P Dow Jones Indices LLC) ("S&P") to maintain and calculate the Index. "SG Americas Securities, LLC", "SGAS", "Société Générale", "SG", "Société Générale Indices", "SGI", and "SG Climate Prepared Index" (collectively, the "SG Marks") are trademarks or service marks of SG or have been licensed for use by agreement with Entelligent Inc. ("Entelligent") and/or other third parties. SG has licensed use of the SG Marks to Minnesota Life Insurance Company ("Licensee") and sub-licensed the use of certain Entelligent marks and/or other third-party marks (the "Third-Party Marks") for use in a fixed indexed annuity offered by Licensee (the "Fixed Indexed Annuities"). SG's sole contractual relationship with Licensee is to license the Index and the SG Marks and sub-license the Third-Party Marks to Licensee.

None of Société Générale, S&P, Entelligent or other third party licensor (collectively, the "Index Parties") to Société Générale is acting, or has been authorized to act, as an agent of Licensee or has in any way sponsored, promoted, solicited, negotiated, endorsed, offered, sold, issued, supported, structured or priced any Fixed Indexed Annuities or provided investment advice to Licensee, and no Index Party makes any representation whatsoever as to the advisability of purchasing, selling or holding any product linked to the Index, including the Fixed Indexed Annuities. No Index Party shall have any liability with respect to the Fixed Indexed Annuities in which an interest crediting option is based on the Index, and is not liable for any loss relating to the Fixed Indexed Annuities, whether arising directly or indirectly from the use of the Index, its methodology, any SG Mark, Third-Party Marks or otherwise. Obligations to make payments under the Fixed Indexed Annuities are solely the obligation of Licensee. The selection of the Index as a crediting option under a Fixed Indexed Annuity does not obligate Licensee or Société Générale to invest annuity payments in the components of the Index.

In calculating the performance of the Index, SG deducts a maintenance fee of 0.50% per annum on the level of the Index, and fixed transaction and replication costs, each calculated and deducted on a daily basis. The transaction and replication costs cover, among other things, rebalancing and replication costs. The total amount of transaction and replication costs is not predictable and will depend on a number of factors, including the leverage of the Index, which may be as high as 200%, the performance of the indexes underlying the Index, market conditions and the changes in the market environments, among other factors. The transaction and replication costs, which are increased by the Index's leverage, and the maintenance fee will reduce the potential positive change in the Index and increase the potential negative change in the Index. While the volatility control applied by the Index may result in less fluctuation in rates of return as compared to indices without volatility controls, it may also reduce the overall rate of return as compared to products not subject to volatility controls.
