Please keep in mind that the primary reason to purchase a life insurance product is the death benefit.

Life insurance products contain charges, such as Cost of Insurance Charge, Cash Extra Charge, and Additional Agreements Charge (which we refer to as mortality charges), and Premium Charge, Monthly Policy Charge, Policy Issue Charge, Transaction Charge, Index Segment Charge, and Surrender Charge (which we refer to as expense charges). These charges may increase over time, and these policies may contain restrictions, such as surrender periods. Policyholders could lose money in these products.

An annuity is intended to be a long-term, tax-deferred retirement vehicle. Earnings are taxable as ordinary income when distributed, and if withdrawn before age 59½, may be subject to a 10% federal tax penalty. If the annuity will fund an IRA or other tax qualified plan, the tax deferral feature offers no additional value. Qualified distributions from a Roth IRA are generally excluded from gross income, but taxes and penalties may apply to non-qualified distributions. There are charges and expenses associated with annuities, such as deferred sales charges (surrender charges) for early withdrawals.

Policy loans and withdrawals may create an adverse tax result in the event of lapse or policy surrender and will reduce both the surrender value and death benefit. Withdrawals may be subject to taxation within the first fifteen years of the contract. You should consult your tax advisor when considering taking a policy loan or withdrawal.
