Statutory Financial Statements and Financial Statement Schedules

December 31, 2024

KPMG LLP Suite 600 350 N. 5th Street Minneapolis, MN 55401

Independent Auditors' Report

The Board of Directors and Stockholder Securian Life Insurance Company:

Opinions

We have audited the financial statements of Securian Life Insurance Company (the Company), which comprise the statutory statements of admitted assets, liabilities and capital and surplus as of December 31, 2024 and 2023, and the related statutory statements of operations and capital and surplus, and cash flow for each of the years in the three-year period ended December 31, 2024, and the related notes to the statutory financial statements.

Unmodified Opinion on Statutory Basis of Accounting

In our opinion, the accompanying financial statements present fairly, in all material respects, the admitted assets, liabilities, and capital and surplus of the Company as of December 31, 2024 and 2023, and the results of its operations and its cash flow for each of the years in the three-year period ended December 31, 2024 in accordance with accounting practices prescribed or permitted by the Minnesota Department of Commerce described in Note 2.

Adverse Opinion on U.S. Generally Accepted Accounting Principles

In our opinion, because of the significance of the matter discussed in the Basis for Adverse Opinion on U.S. Generally Accepted Accounting Principles section of our report, the financial statements do not present fairly, in accordance with U.S. generally accepted accounting principles, the financial position of the Company as of December 31, 2024 and 2023, or the results of its operations or its cash flows for each of the years in the three-year period ended December 31, 2024.

Basis for Opinions

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the Company and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Basis for Adverse Opinion on U.S. Generally Accepted Accounting Principles

As described in Note 2 to the financial statements, the financial statements are prepared by the Company using accounting practices prescribed or permitted by the Minnesota Department of Commerce, which is a basis of accounting other than U.S. generally accepted accounting principles. Accordingly, the financial statements are not intended to be presented in accordance with U.S. generally accepted accounting principles. The effects on the financial statements of the variances between the statutory accounting practices described in Note 2 and U.S. generally accepted accounting principles, although not reasonably determinable, are presumed to be material and pervasive.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting practices prescribed or permitted by the Minnesota Department of Commerce. Management is also responsible for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Company's ability to continue as a going concern for one year after the date that the financial statements are issued.

Auditors' Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud
 or error, and design and perform audit procedures responsive to those risks. Such procedures include
 examining, on a test basis, evidence regarding the amounts and disclosures in the financial
 statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that
 are appropriate in the circumstances, but not for the purpose of expressing an opinion on the
 effectiveness of the Company's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that
 raise substantial doubt about the Company's ability to continue as a going concern for a reasonable
 period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control related matters that we identified during the audit.

Supplementary Information

Our audits were conducted for the purpose of forming an opinion on the financial statements as a whole. The supplementary information included in the schedule of selected financial data, the schedule of supplemental

investment risks interrogatories, the summary investment schedule and the schedule of supplemental reinsurance risks interrogatories is presented for purposes of additional analysis and is not a required part of the financial statements but is supplementary information required by the Minnesota Department of Commerce. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audits of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with GAAS. In our opinion, the information is fairly stated in all material respects in relation to the financial statements as a whole.

Notes to Statutory Financial Statements December 31, 2024, 2023 and 2022

(in thousands)

(1) Nature of Operations

Organization and Description of Business

Securian Life Insurance Company (the Company), is a wholly-owned subsidiary of Minnesota Life Insurance Company (Minnesota Life) and provides a diversified array of insurance, retirement and investment products and services designed principally to protect and enhance the long-term financial security of individuals and families.

The Company, which operates in the United States, generally offers the following types of products:

- Fixed, indexed and universal life, term life and whole life insurance products to individuals through independent channel
 partners.
- Deferred annuities, with fixed rate options through independent channel partners.
- Group life insurance and voluntary products to private and public employers.
- Retirement options to employers and investment firms.
- Life insurance protection through banks, credit unions, and finance companies.

(2) Summary of Significant Accounting Policies

The accompanying statutory financial statements of the Company have been prepared in accordance with accounting practices prescribed or permitted by the Minnesota Department of Commerce. The Minnesota Department of Commerce recognizes statutory accounting practices prescribed or permitted by the state of Minnesota for determining and reporting the financial condition and results of operations of an insurance company and for determining its solvency under the Minnesota Insurance Law. Prescribed statutory accounting practices are those practices that are incorporated directly or by reference in state laws, regulations and general administrative rules applicable to all insurance enterprises domiciled in a particular state. Permitted statutory accounting practices include practices not prescribed by the domiciliary state, but allowed by the domiciliary state regulatory authority. The National Association of Insurance Commissioners' (NAIC) Accounting Practices and Procedures manual (NAIC SAP) has been adopted as a component of prescribed or permitted practices by the state of Minnesota. The state has adopted the prescribed accounting practices as stated in NAIC SAP, without modification. The Company has one material statutory accounting practice that differs from those of the state of Minnesota or the NAIC accounting practices. Certain prior year balances have been reclassified to conform to current year presentation. See note 11 Capital and Surplus and Dividends for discussion of statutory dividend limitations. These practices differ from U.S. generally accepted accounting principles (GAAP).

The more significant differences, of which the aggregate effects are material, are as follows:

- Acquisition costs, such as commissions and other costs incurred in connection with the successful acquisition of new
 and renewal business, are charged to current operations as incurred whereas premiums are recognized as earned over
 the premium paying periods of the policies and contracts. Under GAAP, acquisition costs are capitalized and charged to
 operations as the revenues or expected gross profits are recognized.
- Certain assets are designated as "non-admitted" and changes in such amounts are charged directly to unassigned surplus.
- Policy reserves are based on methods prescribed by the NAIC, which include mortality and interest assumptions without
 consideration for lapses or withdrawals. Under GAAP, policy reserves are based on current best estimates or locked in
 best estimate assumptions on the date of issuance with a provision for adverse deviation, which include considerations
 for lapses and withdrawals.

Notes to Statutory Financial Statements (Continued)

(in thousands)

(2) Summary of Significant Accounting Policies (Continued)

The more significant differences, of which the aggregate effects are material, are as follows (Continued):

- The Company is required to establish an asset valuation reserve (AVR) and an interest maintenance reserve (IMR). The AVR provides for a standardized statutory investment valuation reserve for bonds, preferred stocks, short-term investments, mortgage loans, common stocks, real estate and other invested assets. Changes in this reserve are recorded as direct charges or credits to surplus. The IMR is designed to defer net realized capital gains and losses resulting from changes in the level of interest rates in the market and to amortize them over the remaining life of the bond or mortgage loan sold. The IMR represents the unamortized portion of the bond or mortgage loan not yet taken into income. If IMR is negative, it is designated as non-admitted and is directly charged to unassigned surplus unless the Company adopts a certain limited-time exception to admit net negative IMR. For securities the Company intends to sell in which a write-down is necessary, the Company reviews whether the realized loss affects the IMR or AVR. There are no such requirements on a GAAP basis.
- Investments, other than common stocks, preferred stocks and investments in subsidiaries, are carried at values
 prescribed by the NAIC. GAAP requires investments, other than common stocks, preferred stocks and investments in
 subsidiaries, to be classified as held-to-maturity securities, which are reported at amortized cost, trading securities,
 which are reported at fair value through earnings, or available-for-sale securities, which are reported at fair value through
 stockholder's equity.
- Investments in common stocks and preferred stocks are carried at values prescribed by the NAIC. GAAP requires common stocks and preferred stocks to be reported at fair value through earnings.
- Bonds that have been assigned the NAIC Category 6 designation are carried at the lower of fair value or cost. There are
 no such requirements on a GAAP basis.
- A valuation allowance is established for mortgage loans when it is probable that the Company will not be able to collect
 all amounts due under the contractual terms of the loan. Under GAAP, an allowance for credit losses for mortgage loans
 represents the Company's best estimate of expected credit losses over the remaining life of the loans.
- Deferred federal income taxes are provided for the tax effects of certain income and expense items recognized for income tax purposes in different years than for financial reporting purposes. The change in the net deferred tax asset or liability is reflected in surplus. Admittance testing may result in a charge to capital and surplus for non-admitted portions of the net deferred tax asset. GAAP requires the change to be reported in operations or other comprehensive income.
- In determining the need for tax contingency reserves, consideration is given to whether it is more-likely-than-not that specific uncertain tax benefits will be realized. GAAP subsequently subjects the tax benefits to an additional quantitative measurement step.
- · Certain assets and liabilities are recorded net of the effects of related reinsurance, which is not permitted by GAAP.
- Gain on retrospective reinsurance ceded is reported as a component of special surplus. The gain is amortized into
 unassigned surplus in proportion to earnings on the underlying business reinsured. Under GAAP, the deferred gain
 would be included as a liability and amortized into income using the recovery method.
- The statutory financial statements do not include accumulated other comprehensive income (loss) as required by GAAP.
- Nontraditional life insurance products include individual adjustable life, universal life and variable life insurance and group universal and variable universal life insurance. Revenues from nontraditional life products and deferred annuities consist of premiums received rather than policy and contract fees charged for the cost of insurance, policy administration and surrenders as required under GAAP.
- The statutory statements of cash flow do not classify cash flow consistent with GAAP and a reconciliation of net income
 to net cash provided from operating activities is not provided.

Notes to Statutory Financial Statements (Continued)

(in thousands)

2) Summary of Significant Accounting Policies (Continued)

The more significant differences, of which the aggregate effects are material, are as follows (Continued):

- A provision is established for unsecured reinsurance recoverable balances from unauthorized reinsurers. The change in this provision is credited or charged to unassigned surplus. Under GAAP, a provision is established for uncollectible reinsurance balances with any changes to this provision reflected in earnings for the period.
- Statutory policyholder dividend liabilities are required to be calculated including dividends anticipated to be paid in the next twelve months. GAAP requires a dividend accrual representing dividends due and unpaid through the current yearend
- The calculation of reserves and transfers in the Separate Account Statement requires the use of a Commissioners' Annuity Reserve Valuation Method (CARVM) allowance on annuities and a Commissioners' Reserve Valuation Method (CRVM) allowance on certain life products for statutory reporting. There is no such requirement on a GAAP basis.
- Derivative instruments are recorded at fair value or amortized cost. Changes in derivative instruments recognized at fair value, other than hedges, are recorded as unrealized capital gains and losses on the statutory statements of capital and surplus. Hedges are held using the same accounting methodology as the hedged item. Under GAAP reporting, derivative instruments are held at fair value. Changes in fair value are recorded to realized capital gains and losses, policyholder benefits in the case of certain life insurance product hedging or unrealized capital gains and losses depending on the nature of the hedging relationship, if any, that are designated.
- The Company issues certain indexed universal life contracts that contain features which are considered to be embedded
 derivatives that are not separated between components and are accounted for consistent with the host contract. Under
 GAAP, the embedded derivative is bifurcated from the host contract and accounted for separately as a derivative carried
 at fair value with changes in fair value recorded in net income.
- A deferred premium asset is established to recognize receipt of premiums on a payment mode other than annual. This
 asset is considered an offset to statutory reserve calculations which use only annual modal premium assumptions.
 Deferred premiums are calculated from the current statement date to policy anniversary date. On a GAAP basis,
 deferred premiums are netted against policy reserves and are generally calculated as a constant of gross premiums.
- Policy and contract fees are recognized through the statements of operations as received. Under GAAP, these amounts are reported as unearned revenue and are recognized in operations over the period in which the services are provided.
- The Company periodically invests money in its separate accounts, which is reported as a component of separate
 account assets and unassigned surplus. On a GAAP basis, these investments are reported as investments in equity
 securities, based on the underlying characteristics of the investment.

The significant accounting policies that are reflected in the accompanying statutory financial statements are as follows:

New Accounting Pronouncements

In August 2023, the NAIC adopted Interpretation (INT) 23-01 to provide an optional limited-time exception to guidance in SSAP 7, Asset Valuation Reserve and Interest Maintenance Reserve, to allow for net negative IMR to be reported as an admitted asset, subject to certain qualifications and limitations, with an equal amount reported as special surplus funds. The provisions of this interpretation are permitted until December 31, 2025, but may be adjusted in response to NAIC actions to establish statutory accounting guidance specific to net negative IMR. The Company adopted INT 23-01 on December 31, 2023, resulting in an increase in admitted assets and special surplus of \$3,135. See note 5 Investments for additional disclosures.

In March 2023, the NAIC adopted revisions to Statements of Statutory Accounting Principles (SSAP) 34, Investment Income Due and Accrued, to provide new disclosures of due and accrued investment income. The disclosure requirements were effective for 2023 reporting and are included in note 5 Investments.

Notes to Statutory Financial Statements (Continued)

(in thousands)

2) Summary of Significant Accounting Policies (Continued)

Permitted Practice

The Company has been granted a permitted accounting practice, effective January 1, 2023, from the Minnesota Department of Commerce to reflect changes in discretionary liabilities held on certain indexed universal life policies through surplus in Other, net in statutory statements of operations and capital and surplus instead of through net income as would be required under NAIC SAP. This permitted practice resulted in a pre-tax increase (decrease) of \$(1,000) and \$6,000 for the years ended December 31, 2024 and 2023, respectively, and had no impact on the Company's surplus or risk-based capital.

Revenues and Expenses

Premiums are credited to revenue over the premium paying period of the policies, with the exception of single and flexible premium contracts which are credited to revenue when received from the policyholder. Annuity considerations and investment management, administration and contract guarantee fees are recognized as revenue when received. Any premiums due that are not yet paid, and premiums paid on other than an annual basis, are included in premiums deferred and uncollected on the statutory statements of admitted assets, liabilities and capital and surplus. Benefits and expenses, including acquisition costs related to acquiring new and renewal business, are charged to operations as incurred. Acquisition expenses incurred are reduced for ceding allowances received or receivable.

Valuation of Investments and Net Investment Income

Bonds and stocks are valued as prescribed by the NAIC. Bonds not backed by other loans are generally carried at cost, adjusted for the amortization of premiums, accretion of discounts and any other-than-temporary impairment (OTTI). Premiums and discounts are amortized and accreted over the estimated or contractual lives of the related bonds based on the interest yield method. Prepayment penalties are recorded to net investment income when collected. Bonds that have been assigned the NAIC category 6 designation are carried at the lower of cost or fair value.

Hybrid securities are investments structured to have characteristics of both stocks and bonds. Hybrid securities totaled \$1,500 at December 31, 2024 and 2023, and were classified as bonds on the statutory statements of admitted assets, liabilities and capital and surplus.

Loan-backed securities are stated at either amortized cost or the lower of amortized cost or discounted cash flows. The Company's loan-backed securities are reviewed quarterly, and as a result, the carrying value of a loan-backed security may be reduced to reflect changes in valuation resulting from discounted cash flow information. Loan-backed securities that have been assigned the NAIC category 6 designation are written down to the appropriate fair value. The Company uses a third-party pricing service in assisting the Company's determination of the fair value of most loan-backed securities. An internally developed matrix pricing model, discounted cash flow or other model is used to price a small number of holdings. The retrospective adjustment method is used to record investment income on all non-impaired securities except for interest-only securities or other non-investment grade securities where the yield had become negative. Investment income is recorded using the prospective method on these securities.

For loan-backed securities, the Company recognizes income using a constant effective yield method based on prepayment assumptions obtained from an outside service provider or upon analyst review of the underlying collateral and the estimated economic life of the securities. When estimated prepayments differ from the anticipated prepayments, the effective yield is recalculated to reflect actual prepayments to date and anticipated future payments. Any resulting adjustment is included in net investment income. For loan-backed securities that have a recognized OTTI, the adjusted cost basis is prospectively amortized over the remaining life of the security based on the amount and timing of future estimated cash flows. All other investment income is recorded using the interest method without anticipating the impact of prepayments.

Notes to Statutory Financial Statements (Continued)

(in thousands)

2) Summary of Significant Accounting Policies (Continued)

Valuation of Investments and Net Investment Income (Continued)

Common stocks are carried at fair value.

The Company recognizes interest income as earned and recognizes dividend income on common stock upon declaration of the dividend. Investment income is reported net of related investment expenses. For the years ended December 31, 2024, 2023 and 2022 the Company sold, redeemed or otherwise disposed of 12, 2, and 10 CUSIPs, respectively, as a result of callable features which generated investment income (loss) of \$(579), \$15, and \$300, respectively, from prepayment penalties and acceleration fees.

Preferred stocks are carried at cost less any OTTI adjustments and are classified as other invested assets on the statutory statements of admitted assets, liabilities and capital and surplus.

Mortgage loans are carried at the outstanding principal balances, net of unamortized premiums and discounts. Premiums and discounts are amortized and accreted over the terms of the mortgage loans based on the effective interest yield method. Prepayment penalties are recorded to net investment income. The Company invests primarily in commercial mortgages with a range of interest rates from 5.37% to 6.87% during 2024. In 2024, the maximum percentage of any one loan to value of the collateral at the time of the investment of the loan, exclusive of insured or guaranteed or purchase money mortgages, was 62%.

The Company continues to record interest on those impaired mortgage loans that it believes to be collectible as due and accrued investment income. Any loans that have income 180 days or more past due continue to accrue income, but report all due and accrued income as a non-admitted asset. Past due interest on loans that are uncollectible is written off and no further interest is accrued. Any cash received for interest on loans deemed uncollectible is recorded as income when collected.

The Company's investments in surplus notes of unrelated entities are included in other invested assets on the statutory statements of admitted assets, liabilities and capital and surplus. Surplus note investments with a NAIC designation of NAIC 1 or NAIC 2 are reported at amortized cost. Surplus note investments with a NAIC designation equivalent of NAIC 3 through NAIC 6 are reported at the lesser of amortized cost or fair value. An OTTI is considered to have occurred if it is probable that the Company will be unable to collect all amounts due according to the contractual terms of the surplus note. If it is determined that a decline in fair value is other than temporary, an impairment loss is recognized as a realized loss equal to the difference between the surplus note's carrying value and the fair value and is reported in earnings.

Policy loans are carried at the outstanding loan balance which includes any interest over 90 days past due. Loan balances unsecured by the cash surrender value of the policy and accelerated payment benefits are non-admitted assets which totaled \$0 as of both December 31, 2024 and 2023.

Commercial paper and bonds with original maturity dates of less than twelve months are considered to be short-term investments. Short-term investments are stated at amortized cost. Short-term investments at December 31, 2024 and 2023 totaled \$0 and \$15,828, respectively.

Cash and cash equivalents are carried at cost, which generally approximates fair value. Money market funds are included in cash equivalents and are generally valued at fair value. The Company considers short-term investments that are readily convertible to known amounts of cash and have an original maturity date of three months or less to be cash equivalents. The Company places its cash and cash equivalents with high quality financial institutions and, at times, these balances may be in excess of the Federal Deposit Insurance Corporation insurance limit.

Notes to Statutory Financial Statements (Continued)

(in thousands)

2) Summary of Significant Accounting Policies (Continued)

Derivative Instruments

The Company uses option contracts to manage the risks associated with cash flows or changes in estimated fair values related to the Company's financial instruments. The Company currently enters into derivative transactions that do not qualify for hedge accounting or in certain cases, elects not to utilize hedge accounting.

Derivative instruments are generally carried at fair value with changes in fair value recorded in net change in unrealized capital gains and losses on the statutory statements of capital and surplus. Net investment income generated by derivative instruments is reported in net realized capital gains (losses) on the statutory statements of operations.

Some life insurance products in the Company's liability portfolio contain investment guarantees that create economic exposure to market risks. These guarantees take the form of equity linked interest credits on fixed indexed universal life products. The Company uses economic hedges in its efforts to minimize the financial risk associated with these product guarantees.

Realized and Unrealized Capital Gains and Losses

Realized capital gains and losses, less federal income taxes and amounts transferred to the IMR, if any, are recognized in net income. Unrealized capital gains and losses are accounted for as a direct increase or decrease to capital and surplus. Both realized and unrealized capital gains and losses are determined using the specific identification method.

The Company regularly reviews each investment in its various asset classes to evaluate the necessity of recording impairment losses for other-than-temporary declines in the fair value of the investments. When the Company determines that an invested asset is other-than-temporarily impaired, the invested asset is written down to a new cost basis and the amount of the impairment is included in net realized gains and losses on the statutory statements of operations. Any subsequent recoveries are not recognized until disposition.

Under the Company's accounting policy for loan-backed and structured securities, if the Company has the intent to sell or does not have the intent and ability to retain a security for a period of time sufficient to recover the amortized cost basis, an OTTI is recognized in earnings equal to the difference between the security's amortized cost basis and the fair value. Otherwise, if the present value of cash flows expected to be collected is less than the amortized cost basis of the security, an OTTI is recognized in earnings equal to the difference between the investment's amortized cost basis and the present value of cash flows expected to be collected, discounted at the loan-backed or structured security's original effective interest rate.

For other bonds, when the Company has determined an OTTI has occurred, the security is written-down to fair value. If the impairment is deemed to be non-interest related, an OTTI is recorded in earnings. For interest related declines, an OTTI is recorded when the Company has the intent to sell or does not have the ability to hold the bond until the forecasted recovery occurs. Many criteria are considered during this process including but not limited to, the length of time and the extent to which the current fair value has been below the amortized cost of the security, specific credit issues such as collateral, financial prospects related to the issuer, the Company's intent to sell the security and current economic conditions.

For common stocks, an OTTI is recorded when the Company does not have the intent and ability to hold the investment for a sufficient period of time to allow for anticipated recovery of unrealized losses. When an OTTI has occurred, the entire difference between NAIC fair value and the common stock's cost is charged to earnings. Common stocks that have been in an unrealized loss position of greater than 20% for longer than six months are reviewed specifically using available third party information based on the investee's current financial condition, liquidity, near-term recovery prospects, and other factors. In addition, common stocks that have an unrealized loss position greater than \$100 are reviewed based on the individual characteristics of the stock. Preferred stocks with significant unrealized losses are also reviewed on the same basis for impairment.

All other material unrealized losses are reviewed for any unusual event that may trigger an OTTI. Determination of the status of each analyzed investment as OTTI or not is made based on these evaluations with documentation of the rationale for the decision.

Notes to Statutory Financial Statements (Continued)

(in thousands)

(2) Summary of Significant Accounting Policies (Continued)

Realized and Unrealized Capital Gains and Losses (Continued)

The Company may, from time to time, sell invested assets subsequent to the statutory statements of admitted assets, liabilities and capital and surplus date that were considered temporarily impaired at the statutory statement of admitted assets, liabilities and capital and surplus date for several reasons. The rationale for the change in the Company's intent to sell generally focuses on unforeseen changes in the economic facts and circumstances related to the invested asset subsequent to the statutory statement of admitted assets, liabilities and capital and surplus date, significant unforeseen changes in the Company's liquidity needs, changes in interest rates, or changes in tax laws or the regulatory environment. The Company had no material sales of invested assets, previously considered OTTI or in an unrealized loss position, subsequent to the statutory statement of admitted assets, liabilities and capital and surplus dates for either December 31, 2024 or 2023.

The Company recognizes valuation allowances for impairments of mortgage loans on a specific identification basis. Mortgage loans are considered to be impaired when, based on current information and events, it is probable that the Company will be unable to collect all amounts due according to the contractual terms of the loan agreement. A non-performing loan is defined as a loan that is not performing to the contractual terms of the loan agreement. Examples of non-performing loans may include delinquent loans, requests for forbearance and loans in the process of foreclosure. The valuation allowance is equal to the difference between the carrying value and fair value of the collateral less estimated costs to sell. Changes in the valuation allowance are recorded in net change in unrealized capital gains and losses on the statutory statements of capital and surplus.

Impairment losses are recorded on investments in real estate and other long-lived assets used in operations when indicators of impairment are present, using undiscounted cash flows if available or independent market appraisals.

Separate Accounts

Separate account assets represent segregated funds administered by an unaffiliated asset management firm. These segregated funds are invested by both an unaffiliated asset management firm and an affiliate of the Company for the exclusive benefit of the Company's group variable life insurance policyholders. Assets consist principally of marketable securities and are reported at fair value of the investments held in the segregated funds. Investment income and gains and losses accrue directly to the policyholders. Premiums, benefits and expenses of the separate accounts are reported in the statutory statements of operations. The Company receives administrative and investment advisory fees for services rendered on behalf of these accounts, and such fees are recorded as earned.

Non-admitted Assets

Certain assets, designated as "non-admitted assets" (principally deferred taxes that do not meet admissibility testing, certain prepaid assets and certain receivables), amounting to \$37,044 and \$36,989 at December 31, 2024 and 2023, respectively, have been charged to capital and surplus.

Reinsurance

Insurance liabilities are reported after the effects of ceded reinsurance. Reinsurance recoverables represent amounts due from reinsurers for paid benefits, expense reimbursements and prepaid premiums. Reinsurance premiums ceded and recoveries on benefits and claims incurred are deducted from the respective income and expense accounts.

Policy Reserves

Policy reserves are determined using methods and assumptions consistent with the Standard Valuation Law and presently accepted actuarial standards and guidelines. Policy reserves generally represent the net present value of future benefits less the present value of future net premiums.

Life insurance policy reserves are calculated primarily using the CRVM. The Company uses the principles-based approach (PBR) prescribed by the NAIC Valuation Manual (VM-20) for new life insurance policies issued on or after January 1, 2020. The Company waives deduction of deferred fractional premiums upon death of the insured and returns any portion of the final premium beyond the date of death. At December 31, 2024 and 2023, the amounts of surrender values in excess of reserves were \$45,607 and \$46,571, respectively.

Notes to Statutory Financial Statements (Continued)

(in thousands)

(2) Summary of Significant Accounting Policies (Continued)

Policy Reserves (Continued)

For substandard policies in which reserves are determined using a tabular method, the reserve is calculated by an exact method using multiples of standard mortality as determined by the currently assigned mortality category. As of December 31, 2024 and 2023, the Company had \$1,834 and \$2,443, respectively, of insurance in force for which gross premiums are less than the net premiums according to standard valuation.

Fixed annuity policy reserves are primarily calculated using the CARVM.

Policy reserves on accident and health contracts are determined using tabular and lag factor methods reflecting Company experience. The Company's liability for unpaid accident and health claims and claim adjustment expenses are determined using appropriate interest rate tables, company experience and actuarial studies.

Other policy liabilities include primarily premium considerations for accident and health contracts received in advance for certain group insurance contracts and premium deposit funds. Policy reserves on group annuity contracts purchased under a qualified retirement plan are equal to the account value.

During 2024, the Company recorded a change in valuation basis related to certain reserves on life insurance products. The change in valuation basis resulted in a cumulative effect adjustment to decrease capital and surplus by \$5,290 and is reported in change in reserves due to change in valuation basis on the statutory statements of operations and capital and surplus.

During 2023, the Company recorded changes in the valuation bases related to certain reserves on individual life insurance and annuity products. These changes in valuation bases resulted in a cumulative effect adjustment to increase capital and surplus by \$7,150 and is reported in change in reserve due to change in valuation basis on the statutory statements of operations and capital and surplus. The tax impact of these adjustments are \$7; of which \$5 is included in net change in deferred taxes and \$2 is included in federal income tax expense (benefit) on the statutory statements of operations and capital and surplus.

During 2023, the Company retrospectively adopted Actuarial Guideline XLIV (AG 44) related to valuation of certain group waiver reserves for disability claim onsets occurring on or after January 1, 2009.

Liability for Accident and Health Losses and Loss Adjustment Expenses

The liability for unpaid losses and loss adjustment expenses includes an amount for losses incurred but unreported, based on past experience, as well as an amount for reported but unpaid losses, which is calculated on a case-by-case basis. Such liabilities are necessarily based on assumptions and estimates. While management believes that the amount is adequate, the ultimate liability may be in excess of or less than the amount estimated. The methods, including key assumptions, of making such estimates and for establishing the resulting liability are continually reviewed and any adjustments are reflected in the period such change in estimate is made. The liability for unpaid accident and health claims and claim adjustment expenses, net of reinsurance, is included in accident and health policy reserves and policy claims in process of settlement on the statutory statements of admitted assets, liabilities and capital and surplus.

Notes to Statutory Financial Statements (Continued)

(in thousands)

(2) Summary of Significant Accounting Policies (Continued)

Participating Business

Dividends on participating policies and other discretionary payments are declared by the Board of Directors based upon actuarial determinations that take into consideration current mortality, interest earnings, expense factors and federal income taxes. Dividends are generally recognized as expenses when declared by the Board of Directors and up to one year in advance of the payout dates. At December 31, 2024 and 2023, the total participating business in force was \$30,460 and \$34,744, respectively. As a percentage of total life insurance in force, participating business in force represented less than 1% at both December 31, 2024 and 2023.

For 2024, 2023 and 2022, premiums under individual policies were \$525, \$601 and \$671, respectively. The Company accounts for its policyholder dividends based upon the contribution method. The Company paid dividends in 2024, 2023 and 2022 in the amount of \$30, \$44, and \$42, respectively, to policyholders and did not allocate any additional income to such policyholders.

Federal Income Taxes

The Company files a consolidated life/non-life federal income tax return with Minnesota Mutual Companies, Inc. (MMC), the Company's ultimate parent. Entities included in the consolidated return include: Securian Holding Company, Robert Street Property Management, Inc., Securian Financial Group, Inc. (SFG), Securian Casualty Company, Securian Specialty Lines Inc., Securian Ventures, Inc., Securian Financial Services, Inc. (SFS), Securian Asset Management, Inc. (Securian AM), Ochs Inc., Lowertown Capital, LLC, Empyrean Holding Company, Inc. and its subsidiaries and Minnesota Life Insurance Company and its subsidiaries.

Empyrean Holding Company's subsidiaries include Empyrean Benefits Solutions, Inc. and Empyrean Insurance Services, Inc.

Minnesota Life's subsidiaries include the Company, Allied Solutions LLC (Allied), Securian AAM Holdings, LLC, Marketview Properties, LLC, Marketview Properties II, LLC, Marketview Properties IV, LLC and Oakleaf Service Corporation.

The method of allocation between companies is subject to written agreement, approved by an officer of the Company. Under the agreement, the Company computes federal income taxes on a separate return basis, and benefit is given for operating losses and credits as utilized to reduce consolidated federal income taxes. Intercompany tax balances are settled annually when the tax return is filed with the Internal Revenue Service (IRS).

The Company provides for federal income taxes based on amounts the Company believes it ultimately will owe. Inherent in the provision for federal income taxes are estimates regarding the deductibility of certain items and the realization of certain tax credits. In the event the ultimate deductibility of certain items or the realization of certain tax credits differs from estimates, the Company may be required to significantly change the provision for federal income taxes recorded in the statutory financial statements. Any such change could significantly affect the amounts reported in the statutory statements of operations. Management has used best estimates to establish reserves based on current facts and circumstances regarding tax exposure items where the ultimate deductibility is open to interpretation. Management evaluates the appropriateness of such reserves based on any new developments specific to their fact patterns. Information considered includes results of completed tax examinations, Technical Advice Memorandums and other rulings issued by the IRS or the tax courts.

Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss and tax credit carryforwards. Gross deferred tax assets and liabilities are measured using enacted tax rates, and a statutory valuation allowance must be established if it is more likely than not that some portion or all of the gross deferred tax assets will not be realized. The adjusted gross deferred tax assets are then considered for admitted asset status according to the admissibility tests as set forth by the NAIC. Changes in deferred tax assets and deferred tax liabilities, including changes attributable to changes in tax rates, are recognized as a component of unassigned surplus.

Notes to Statutory Financial Statements (Continued)

(in thousands)

(2) Summary of Significant Accounting Policies (Continued)

Use of Estimates

The preparation of financial statements in conformity with statutory accounting practices requires management to make certain estimates and assumptions that affect reported assets and liabilities, including reporting or disclosure of contingent assets and liabilities as of the dates of the statutory statements of admitted assets, liabilities and capital and surplus and the reported amounts of revenues and expenses during the reporting period. Future events, including but not limited to, changes in mortality, morbidity, interest rates and asset valuations, could cause actual results to differ from the estimates used in the financial statements and such changes in estimates are generally recorded on the statutory statements of operations in the period in which they are made.

The most significant estimates include those used in determining policy reserves, policy claims in process of settlement, valuation of and impairment losses on investments, and federal income taxes. Although some variability is inherent in these estimates, the recorded amounts reflect management's best estimates based on facts and circumstances as of the statutory statements of admitted assets, liabilities and capital and surplus date. Management believes the amounts provided are appropriate.

(3) Risks

The Company's financial statements are based on estimates and assumptions that are subject to significant business, economic and competitive risks and uncertainties, many of which are beyond the Company's control or are subject to change. As such, actual results could differ from the estimates used in the financial statements and the value of the Company's investments, its financial condition and its liquidity could be adversely affected. The following risks and uncertainties, among others, may have such an effect:

- Economic environment and capital markets-related risks such as those related to interest rates, equity markets, credit spreads, real estate, and derivatives.
- Investment-related risks such as those related to valuation, impairment, and concentration.
- Business and operational-related risks such as those related to mortality/longevity, morbidity and claims experience, reinsurers and counterparties, liquidity, ratings, competition, cyber or other information security, fraud, and overall risk management.
- Catastrophic and pandemic event-related risks that may impact policyholder behavior and claims experience, volatility in financial markets and economic activity, and operations.
- Acquisition, disposition, or other structural change related risks.
- Regulatory and legal risks such as those related to changes in fiscal, tax and other legislation, insurance regulation, and accounting standards.

The Company actively monitors and manages risks and uncertainties through a variety of policies and procedures in an effort to mitigate or minimize the adverse impact of any exposures impacting the financial statements.

(4) Fair Value of Financial Instruments

Financial Assets and Financial Liabilities Reported at Fair Value

The fair value of the Company's financial assets and financial liabilities has been determined using available market information as of December 31, 2024 and 2023.

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability (exit price) in an orderly transaction between market participants at the measurement date. In determining fair value, the Company primarily uses the market approach which utilizes prices and other relevant information generated by market transactions involving identical or comparable assets or liabilities. To a lesser extent, the Company also uses the income approach which uses discounted cash flows to determine fair value. When applying either approach, the Company maximizes the use of observable inputs and minimizes the use of unobservable inputs. Observable inputs reflect the assumptions market participants would use in valuing a financial instrument based on market data obtained from sources independent of the Company. Unobservable inputs reflect the Company's estimates about the assumptions market participants would use in valuing financial assets and financial liabilities based on the best information available in the circumstances. Considerable judgment is required to interpret market data to develop the estimates of fair value. The use of different market assumptions and/or estimation methodologies may have a material effect on the estimated fair value amounts.

Notes to Statutory Financial Statements (Continued)

(in thousands)

(4) Fair Value of Financial Instruments (Continued)

Financial Assets and Financial Liabilities Reported at Fair Value (Continued)

The Company is required to categorize its financial assets and financial liabilities carried at fair value on the statutory statements of admitted assets, liabilities and capital and surplus according to a three-level hierarchy. A level is assigned to each financial asset and financial liability based on the lowest level input that is significant to the fair value measurement in its entirety. The levels of fair value hierarchy are as follows:

Level 1 - Fair value is based on unadjusted quoted prices for identical assets or liabilities in an active market.

Level 2 – Fair value is based on significant inputs, other than quoted prices included in Level 1, that are observable in active markets for identical or similar assets and liabilities.

Level 3 – Fair value is based on at least one or more significant unobservable inputs. These inputs reflect the Company's assumptions about the inputs market participants would use in pricing the assets or liabilities.

The Company uses prices and inputs that are current as of the measurement date. In periods of market disruption, the ability to observe prices and inputs may be reduced, which could cause an asset or liability to be reclassified to a lower level.

The following table summarizes the Company's financial assets and financial liabilities carried at fair value as of December 31, 2024:

	_evel 1	Level 2	Level 3	Total
Common stocks	\$ 7,680	\$ 	\$ 345	\$ 8,025
Derivative instruments	_	37,090	_	37,090
Cash equivalents	24,156	_	_	24,156
Separate account assets	_	4,252	_	4,252
Total financial assets	\$ 31,836	\$ 41,342	\$ 345	\$ 73,523
Derivative instruments (1)	\$ _	\$ 21,516	\$ _	\$ 21,516
Total financial liabilities	\$ 	\$ 21,516	\$ 	\$ 21,516

⁽¹⁾ Included in other liabilities on the statutory statements of admitted assets, liabilities and capital and surplus.

The following table summarizes the Company's financial assets and financial liabilities carried at fair value as of December 31, 2023:

L	_evel 1		Level 2		Level 3		Total
\$	6,921	\$	_	\$	586	\$	7,507
	_		35,434		_		35,434

Notes to Statutory Financial Statements (Continued)

(in thousands)

(4) Fair Value of Financial Instruments (Continued)

Financial Assets and Financial Liabilities Reported at Fair Value (Continued)

The methods and assumptions used to estimate the fair value of financial assets and liabilities are summarized as follows:

Common stocks

The Company's common stocks consist primarily of investments in publicly traded companies. The fair values of common stocks are based on quoted market prices in active markets for identical assets and are classified within Level 1. The Company carried a small amount of non-exchange traded common stock classified within Level 3.

Derivative instruments

Derivative instrument fair values are based on quoted market prices when available. If a quoted market price is not available, fair value is estimated using current market assumptions and modeling techniques, which are then compared with quotes from counterparties.

The majority of the Company's derivative positions are traded in the Over-the-Counter (OTC) derivative market and are classified as Level 2. The fair values of most OTC derivatives are determined using discounted cash flow pricing models. The significant inputs to the pricing models are observable in the market or can be derived principally from or corroborated by observable market data. Significant inputs that are observable generally include: interest rates, foreign currency exchange rates, interest rate curves, credit curves and volatility. However, certain OTC derivatives may rely on inputs that are significant to the estimated fair value that are not observable in the market or cannot be derived principally from or corroborated by observable market data. Significant inputs that are unobservable generally include: independent broker quotes and inputs that are outside the observable portion of the interest rate curve, credit curve, volatility or other relevant market measure. These unobservable inputs may involve significant management judgment or estimation. In general, OTC derivatives are compared to an outside broker quote when available and are reviewed in detail through the Company's valuation oversight group. OTC derivatives valued using significant unobservable inputs would be classified as Level 3.

The credit risk of both the counterparty and the Company are considered in determining the estimated fair value for all OTC derivatives after taking into account the effects of netting agreements and collateral arrangements.

Cash equivalents

Money market funds are reported as cash equivalents. All money market funds are generally valued using unadjusted prices in active markets and are reflected in Level 1.

Separate account assets

Separate account assets are reported as a summarized total and are carried at estimated fair value based on the underlying assets in which the separate accounts are invested. Valuations for common stock and short-term investments are determined consistent with similar instruments as previously described. When available, fair values of bonds are based on quoted market prices of identical assets in active markets and are reflected in Level 1. When quoted prices are not available, the Company's process is to obtain prices from third party pricing services, when available, and generally classify the security as Level 2. Valuations for certain mutual funds and pooled separate accounts are classified as Level 2 as the values are based upon quoted prices or reported net asset values provided by the fund managers with little readily determinable public pricing information. Other valuations using internally developed pricing models or broker quotes are generally classified as Level 3.

(4) Fair Value of Financial Instruments (Continued)

Financial Assets and Financial Liabilities Reported at Other Than Fair Value

The Company uses various methods and assumptions to estimate the fair value of financial assets and financial liabilities that are not carried at fair value on the statutory statements of admitted assets, liabilities and capital and surplus.

Refer to note 2 Summary of Significant Accounting Policies and note 6 Derivative Instruments for additional fair value disclosures concerning bonds, cash equivalents, short-term investments, other assets and derivatives.

When available, fair values of bonds and surplus notes of unrelated entities are based on quoted market prices of identical assets in active markets and are reflected in Level 1.

When quoted prices are not available, the Company's process is to obtain prices from third party pricing services, when available. The Company generally receives prices from pricing services and maintains a vendor hierarchy by asset type based on historical pricing experience and vendor expertise. The Company's primary pricing service has policies and processes to ensure that it is using objectively verifiable observable market data. The pricing service regularly reviews the valuation inputs for investments covered and publishes and updates a summary of inputs used in its valuations by major type. The market inputs utilized in the pricing valuation depend on asset class and market conditions but typically include: benchmark yields, reported trades, broker/dealer quotes, issuer spreads, benchmark securities, bids, offers, reference data, and industry and economic events. If the pricing service determines it does not have sufficient objectively verifiable information about an instrument's valuation, it discontinues providing a valuation. In this instance, the Company would be required to produce its own internally modeled estimate of fair value.

Prices are reviewed by affiliated asset managers and management to validate reasonability. Instruments with validated prices from pricing services are generally reflected in Level 2. If the pricing information received from third party pricing services is not reflective of market activity or other inputs observable in the market, the Company may challenge the price through a formal process with the pricing service. If the pricing service updates the price to be more consistent in comparison to the presented market observations, the instrument remains within Level 2.

For instruments where quoted market prices are not available or the Company concludes the pricing information received from third party pricing services is not reflective of market activity - generally private placement bonds or bonds that do not trade regularly - a matrix pricing, discounted cash flow or other model is used. The pricing models are developed by obtaining spreads versus the U.S. Treasury yield for corporate bonds with varying weighted average lives and ratings. The weighted average life and rating of a particular instrument to be priced are important inputs into the model and are used to determine a corresponding spread that is added to the U.S. Treasury yield to create an estimated market yield for that instrument. The estimated market yield, liquidity premium, any adjustments for known credit risk, and other relevant factors are then used to estimate the fair value. Certain other valuations are based on independent non-binding broker quotes. Instruments valued using pricing models or broker quotes are reflected in Level 3.

Fair values of mortgage loans are based upon matrix pricing and discounted cash flows. Fair values of policy loans are estimated by discounting expected cash flows. The expected cash flows reflect an estimate for the timing of repayment of the loans and weighted average loan interest rates.

The fair value of deferred annuities, which have guaranteed interest rates and surrender charges, were calculated using CARVM calculation procedures and current market interest rates. The Company believes this a reasonable approximation of fair value. Contracts without guaranteed interest rates and surrender charges have fair values equal to their accumulation values plus applicable market value adjustments.

The fair value of annuity certain contracts and supplementary contracts without life contingencies are calculated using discounted cash flows, based on interest rates currently offered for similar products with maturities consistent with those remaining for the contracts being valued.

(5) Investments

Bonds and Stocks

The Company's bond portfolio consists of public and private corporate bonds, mortgage and other asset-backed bonds and U.S. government and agency obligations.

The Company invests in private placement bonds to enhance the overall value of its portfolio, increase diversification and obtain higher yields than are possible with comparable publicly traded bonds. Generally, private placement bonds provide broader access to management information, strengthened negotiated protective covenants, call protection features and, frequently, improved seniority of collateral protection. Private placement bonds generally are only tradable subject to restrictions by federal and state securities laws and are, therefore, less liquid than publicly traded bonds.

The Company holds CMBS that may be originated by single or multiple issuers, which are collateralized by mortgage loans secured by income producing commercial properties such as office buildings, multi-family dwellings, industrial, retail, hotels and other property types.

The Company's RMBS portfolio consists of pass-through securities, which are pools of mortgage loans collateralized by single-family residences and primarily issued by government sponsored entities (e.g., GNMA, FNMA and FHLMC), and structured pass-through securities, such as collateralized mortgage obligations, that may have specific prepayment and maturity profiles and may be issued by either government sponsored entities or "private label" issuers. The Company's RMBS portfolio primarily contains loans made to borrowers with strong credit histories. The Company's portfolio consisted of \$126,243 and \$133,511 agency backed RMBS as of December 31, 2024 and 2023, respectively and non-agency backed RMBS of \$503 and \$0 as of December 31, 2024 and 2023, respectively. The Company's RMBS portfolio also includes Alt-A mortgage loans to customers who have good credit ratings but have limited documentation for their source of income or some other standards used to underwrite the mortgage loan, and subprime residential loans to customers with weak credit profiles, including mortgages originated using relaxed mortgage-underwriting standards.

The Company's asset-backed securities portfolio consists of securities collateralized by the cash flows of receivables relating to airline, transportation equipment, credit cards, automobiles, and other asset class loans.

The admitted asset value, gross unrealized gains and losses and estimated fair value of investments in bonds were as follows:

For bonds where the carrying value exceeds fair value, the Company expects to collect all principal and interest payments, excluding previously recorded OTTI. In determining whether an impairment is other than temporary, the Company evaluates its intent and need to sell a security prior to its anticipated recovery in fair value. The Company performs ongoing analysis of liquidity needs, which includes cash flow testing. Cash flow testing includes duration matching of the investment portfolio and policyholder liabilities. As of December 31, 2024, the Company does not intend to sell and does not believe that it will be required to sell investments with an unrealized loss prior to recovery.

The following paragraphs summarize the Company's evaluation of investment categories where carrying value exceeds fair value as of December 31, 2024.

U.S. government securities are temporarily impaired due to current interest rates and not credit-related reasons. The Company expects to collect all principal and interest on these securities.

Unrealized losses related to corporate securities are due to interest rates that are higher, and current market spreads that are wider than at the securities' respective purchase dates. The Company performed an analysis of the financial performance of the underlying issuers and determined that the entire amortized cost for each temporarily impaired security is expected to be recovered.

Asset-backed securities, CMBS and RMBS are impacted by both interest rates and the value of the underlying collateral. The Company utilizes discounted cash flow models using outside assumptions to determine if an OTTI is warranted.

The Company's CMBS portfolio had initial ratings of AA or higher and are diversified by property type and geographic location. The Company's CMBS portfolio is primarily super senior and senior securities as opposed to mezzanine or below. Commercial real estate fundamentals have impacted most of the asset class and the Company has recognized OTTI when warranted.

The Company's RMBS portfolio primarily consists of residential mortgages to prime borrowers. Fluctuations in the housing market continue to impact the valuations across the entire asset class. As of December 31, 2024, 100% of the RMBS portfolio was invested in agency pass-through securities.

Bonds and Stocks (Continued)

At December 31, 2024 and 2023, bonds with a carrying value of \$6,462 and \$6,448, respectively, were on deposit with state regulatory authorities as required by law.

The common stock portfolio is managed with the objective of capturing long-term capital gains with a moderate level of current income. The carrying value of the Company's common stock portfolio totaled \$9,809 and \$8,932 as of December 31, 2024 and 2023, respectively.

The Company had certain common stocks with a reported fair value lower than the cost of the investment as follows:

		Less than 12 months									
	Fair	value	Cost		Unrealized losses		Security count				
December 31, 2024	\$	345	\$	538	\$	193	1				
December 31, 2023		_		_		_	_				

The preferred stock portfolio is primarily made up of mandatory redeemable preferred stocks. The carrying value of the Company's preferred stock portfolio totaled \$7,000 as of December 31, 2024 and 2023.

The Company had certain preferred stocks with a reported fair value lower than the cost of the investment as follows:

		12 months or greater									
	Fair value		Cost		Unrealized losses		Security count				
December 31, 2024	\$	4,661	\$	5,000	\$	339	2				
December 31, 2023		4,294		5,000		706	2				

Mortgage Loans

The Company underwrites and purchases commercial mortgages on general purpose income producing properties. The Company has defined its portfolio segment as the commercial mortgage loan portfolio in total with the class segments defined as office buildings, retail facilities, apartment, industrial and other properties. Geographic and property type diversification is also considered in analyzing investment opportunities, as well as property valuation and cash flow. The mortgage loan portfolio totaled \$567,378 and \$404,041 at December 31, 2024 and 2023, respectively. Mortgage loans in which the Company is a participant totaled \$318,635 and \$274,177 at December 31, 2024 and 2023, respectively.

All of the Company's commercial mortgage loan investments are managed and serviced directly by an affiliate, Securian AM. The Company currently does not hold any condominium commercial mortgage loan, construction, mezzanine or land loan investments.

Mortgage Loans (Continued)

The following table shows the composition of the Company's commercial mortgage loan portfolio, net of valuation allowances, by class as of December 31:

	20	24	2023		
Industrial	\$ 1	140,965	\$	105,839	
Office buildings		68,753		58,164	
Retail facilities	1	160,555		106,298	
Apartment	1	160,140		121,554	
Other		36,965		12,186	
Total	\$ 5	67,378	\$	404,041	

If information is obtained on commercial mortgage loans that indicates a potential problem (likelihood of the borrower not being able to comply with the present loan repayment terms), the loan is placed on an internal surveillance list, which is routinely monitored by the Company. Among the criteria that would indicate a potential problem are: borrower bankruptcies, major tenant bankruptcies, loan relief/restructuring requests, delinquent tax payments, late payments, and vacancy rates.

A valuation allowance is established when it is probable that the Company will not be able to collect all amounts due under the contractual terms of the loan.

The following table provides a summary of the valuation allowance for the mortgage loan portfolio for the years ended December 31:

	2024			2023	2022	
Balance at beginning of year	\$	1,000	\$		\$	
Change in allowance		(1,000)		1,000		_
Balance at end of year	\$		\$	1,000	\$	

As of December 31, 2024 and 2023, the Company had no delinquent mortgage loans.

The Company assesses the credit quality of its mortgage loan portfolio by reviewing the performance of its portfolio which includes evaluating its performing and nonperforming mortgage loans. Nonperforming mortgage loans include loans that are not performing to the contractual terms of the loan agreement. Nonperforming mortgage loans do not include restructured loans that are current with payments and thus are considered performing.

As of December 31, 2024 and 2023, there were no nonperforming loans.

There was one restructured loan with a total carrying value of \$2,313 in the office buildings class at December 31, 2024. The Company is a participant in this loan and cannot unilaterally foreclose on the property. For the year ended December 31, 2024, the Company recognized total interest income of \$75. There were no restructured loans that subsequently defaulted during 2024. The Company did not have any outstanding commitments to lend additional funds to borrowers with restructured loans as of December 31, 2024.

For the year ended December 31, 2023, the Company did not have any material troubled debt restructurings.

(5) Investments (Continued)

Net Realized Capital Gains (Losses) (Continued)

OTTI by asset type recognized in net realized capital gains (losses) for the years ended December 31 were as follows:

	2	2024 2023		2023	2022	
Bonds:						
Corporate securities	\$	_	\$	(1,314)	\$	_
Mortgage loans		(780)				
Total OTTI	\$	(780)	\$	(1,314)	\$	

In relation to loan-backed and structured securities, the Company did not recognize OTTI on the basis of the intent to sell during 2024, 2023 or 2022. The Company also did not recognize any OTTI on the basis of the inability or lack of intent to retain the investment in the security for a period of time sufficient to recover the amortized cost basis during 2024, 2023 or 2022.

Gross and admitted net aggregate net negative IMR was \$2,966 and \$3,135 as of December 31, 2024 and 2023, respectively, and the full amount was related to the general account. Admitted net negative IMR represented 0.6% and 0.7% of general account adjusted surplus of \$523,567 and \$456,472 as of December 31, 2024 and 2023. Fixed income investments generating IMR losses comply with the Company's documented investment or liability management policies and asset sales that generated admitted negative IMR were not compelled by liquidity pressures.

Changes in net unrealized capital gains (losses) for the years ended December 31 were as follows:

	2024			2023	2022	
Common stocks – unaffiliated	\$	518	\$	(168)	\$	(118)
Derivative instruments		(510)		7,953		(8,673)
Other		973		(991)		(86)
Deferred tax asset (liability)		(206)		(1,427)		1,864
Total	\$	775	\$	5,367	\$	(7,013)

Cost and gross unrealized gains (losses) on unaffiliated common stocks at December 31 were as follows:

	2024	2023	
Cost	\$ 6,934	\$	6,575
Gross unrealized gains	 2,875		2,357
Admitted asset value	\$ 9,809	\$	8,932

(6) Derivative Instruments

Derivatives are financial instruments whose values are derived from interest rates, foreign currency exchange rates, or other financial indices. Derivatives may be exchange-traded or contracted in the OTC market. The Company currently enters into derivative transactions that do not qualify for hedge accounting, or in certain cases, elects not to utilize hedge accounting. The Company does not enter into speculative positions. Although certain transactions do not qualify for hedge accounting or the Company chooses not to utilize hedge accounting, they provide the Company with an assumed economic hedge, which is used as part of its strategy for certain identifiable and anticipated transactions. The Company uses option contracts to manage the risk associated with changes in estimated fair values related to the Company's financial assets and liabilities, to generate income and manage other risks due to the variable nature of the Company's cash flows.

Freestanding derivatives are carried on the Company's statutory statements of admitted assets, liabilities and capital and surplus either as assets within derivative instruments or as liabilities within other liabilities at estimated fair value as determined through the use of quoted market prices for exchange-traded derivatives or through the use of pricing models for OTC derivatives. Derivative valuations can be affected by changes in interest rates, foreign currency exchange rates, financial indices, credit spreads, default risk (including the counterparties to the contract), volatility, liquidity and changes in estimates and assumptions used in the pricing models.

Notes to Statutory Financial Statements (Continued)

(in thousands)

(6) Derivative Instruments (Continued)

The Company is exposed to various risks relating to its ongoing business operations, including interest rate risk and equity market risk. The Company uses a variety of strategies to attempt to manage these risks. The following table presents the notional amount, estimated fair value, and primary underlying risk exposure of the Company's derivative financial instruments held:

				December 31, 2024						December 31, 2023			
					Fair value						Fair value		
Primary underlying risk exposure	Instrument type	Notio	onal amount		Assets	Li	iabilities ⁽¹⁾	Notio	onal amount		Assets	Lia	abilities ⁽¹⁾
Equity market	Equity options	\$	609,775	\$	37,090	\$	21,516	\$	504,424	\$	35,434	\$	20,947
Total	derivatives	\$	609,775	\$	37,090	\$	21,516	\$	504,424	\$	35,434_	\$	20,947

⁽¹⁾ The estimated fair value of all derivatives in a liability position is reported within other liabilities on the statutory statements of admitted assets, liabilities and capital and surplus.

The freestanding derivatives utilized by the Company are for specific economic hedging programs related to various life insurance product liabilities that have market risk. Management considers the sales growth of products and the volatility in the markets in assessing the trading activity for these programs.

Equity options are used by the Company to economically hedge certain risks associated with fixed indexed universal life products that allow the holder to elect an interest rate return or a market component, where interest credited to the contracts is linked to the performance of an index. Certain contract holders may elect to rebalance index options at renewal dates. As of each renewal date, the Company has the opportunity to re-price the indexed component by establishing participation rates, caps, spreads and specified rates, subject to contractual guarantees. The Company purchases equity options that are intended to be highly correlated to the portfolio allocation decisions of the contract holders with respect to returns for the current reset period.

The following tables present the amount and location of gains (losses) recognized on the statutory statements of operations and capital and surplus from derivatives:

			2	024		
		ilized capital s (losses)		vestment come	unrealiz	hange in zed capital and losses

(6) Derivative Instruments (Continued)

	2022							
		alized capital ns (losses)	Net inve		Net change in unrealized capital gains and losses			
Equity options	\$	(3,049)	\$		\$	(8,673)		
Total losses recognized from derivatives	\$	(3,049)	\$	<u> </u>	\$	(8,673)		

The Company may be exposed to credit-related losses in the event of nonperformance by counterparties to derivative financial instruments. Generally, the current credit exposure of the Company's derivative contracts is limited to the positive estimated fair value of derivative contracts at the reporting date after taking into consideration the existence of netting agreements and any collateral received pursuant to credit support annexes.

The Company manages its credit risk related to OTC derivatives by entering into transactions with highly rated counterparties, maintaining collateral arrangements and through the use of master agreements that provide for a single net payment to be made by one counterparty to another at each due date and upon termination. Because exchange traded futures are purchased through regulated exchanges, and positions are settled on a daily basis, the Company has minimal exposure to credit-related losses in the event of nonperformance by counterparties to such derivative instruments.

The Company enters into various collateral arrangements, which require both the pledging and accepting of collateral in connection with its derivative instruments. The Company's collateral arrangements for its OTC derivatives generally require the counterparty in a net liability position, after considering the effect of netting arrangements, to pledge collateral when the fair value of that counterparty's derivatives reaches a pre-determined threshold. The Company received collateral from OTC counterparties in the amount of \$16,000 and \$14,500 at December 31, 2024 and 2023, respectively. Securities collateral received by the Company is held in separate custodial accounts and is not recorded on the statutory statements of admitted assets, liabilities and capital and surplus. Credit agreements with counterparties permit the Company to sell or re-pledge this collateral; at December 31, 2024 and 2023, none of the collateral had been sold or re-pledged. The Company delivered collateral in the amount of \$0 at December 31, 2024 and 2023. The Company maintained ownership of any collateral delivered. Securities collateral pledged by the Company is reported in bonds on the statutory statements of admitted assets, liabilities and capital and surplus.

(7) Separate Accounts

Separate account assets represent segregated funds administered by an unaffiliated asset management firm. These segregated funds are invested by both an unaffiliated asset management firm and an affiliate of the Company for the exclusive benefit of the Company's variable annuity life insurance policyholders.

The Company has no indexed separate accounts or guaranteed benefit accounts.

Information regarding the separate accounts of the Company was as follows:

(8) Federal Income Taxes (Continued)

As of December 31, 2024 and 2023, the availability of tax planning strategies resulted in no change to the Company's adjusted gross deferred tax assets and net admitted deferred tax assets.

The Company did not use any reinsurance tax planning strategies.

The tax effects of temporary differences that give rise to the Company's net deferred federal tax asset as of December 31 were as follows:

	2024	2023		
Deferred tax assets:	-			
Ordinary:				
Policyholder liabilities	\$ 23,675	\$ 17,215		
Deferred acquisition costs	32,872	30,714		
Loading	2,334	1,567		
Non-admitted assets	777	777		
Investments	1,563	1,670		
Other	14	(224)		
Gross ordinary deferred tax assets	61,235	51,719		
Non-admitted ordinary deferred tax assets	(33,736) (33,289)		
Admitted ordinary deferred tax asset	27,499	18,430		
Capital:				
Investments	2,135	1,971		
Other	1,264	1,670		
Gross capital deferred tax assets	3,399	3,641		
Non-admitted capital deferred tax assets		<u> </u>		
Admitted capital deferred tax asset	3,399	3,641		
Admitted deferred tax assets	30,898	22,071		
Deferred tax liabilities:				
Ordinary:				
Investments	2,592	1,648		
Prepaid expenses	426	426		
Deferred and uncollected premium	4,583	3,459		
Policyholder liabilities	200	370		
Other	87	184		
Gross ordinary deferred tax liabilities	7,888	6,087		
Capital:				
Net unrealized capital gains	2,161	1,955		
Gross capital deferred tax liabilities	2,161	1,955		
Gross deferred tax liabilities	10,049	8,042		
Net deferred tax asset	\$ 20,849	\$ 14,029		

As of December 31, 2024 and 2023, management determined that a valuation allowance was not required for these gross deferred tax items based on management's assessment that it is more likely than not that these deferred tax items will be realized through future reversals of existing taxable temporary differences and future taxable income. There are no differences for which deferred tax liabilities are not recognized.

(8) Federal Income Taxes (Continued)

The change in net deferred income taxes is comprised of the following:

	2024		2023		C	hange
Total deferred tax assets	\$	64,634	\$	55,360	\$	9,274
Total deferred tax liabilities		(10,049)		(8,042)		(2,007)
Change in net deferred income tax	\$	54,585	\$	47,318		7,267
Tax effect of deferred tax asset on unrealized capital losses						206
Change in net deferred tax as reported in surplus						7,473
Tax effect of statutory reserve surplus adjustment on deferred tax asset						
Change in net deferred income tax asset					\$	7,473

As of December 31, 2024, the Company had no net operating loss carryforwards, capital loss carryforwards or tax credit carryforwards. Total capital income taxes incurred in the current and prior years of \$1,222 are available for recovery in the event of future net losses.

There were no deposits reported as admitted assets under Section 6603 of the (IRS) Code in 2024.

There were no accrued interest or penalties recorded as of December 31, 2024.

There was no unrecognized tax benefit for the years ending December 31, 2024 and 2023.

The Company does not expect a significant increase in tax contingencies within the next 12 months following the statutory statements of admitted assets, liabilities and capital and surplus date.

The Company is a nonapplicable reporting entity for the purposes of the Corporate Alternative Minimum Tax for the reporting period ending December 31, 2024.

All tax years through 2020 are closed. The IRS has not stated its intention to audit the MMC 2021, 2022 or 2023 consolidated tax return.

(9) Related Party Transactions

The Company has an agreement with Minnesota Life, where Minnesota Life processes premiums and claims on behalf of the Company. These amounts are settled quarterly on a net basis. The Company also has agreements with Minnesota Life and other affiliates for expenses including charges for occupancy costs, data processing, compensation and benefits, advertising and promotion, and other administrative expenses which they incurred on behalf of the Company. At December 31, 2024 and 2023, the Company reported \$42,061 and \$31,682, respectively, as net amounts due to Minnesota Life and \$776 and \$575, respectively, as net amounts due to other affiliates. These amounts were subsequently settled. The amount of expenses incurred by the Company related to these agreements for the years ended December 31, 2024, 2023 and 2022 were \$112,593, \$96,026, and \$66,042, respectively.

The Company has investment advisory agreements with an affiliate, Securian AM. Under these agreements, the Company incurs quarterly investment management fees based on total assets managed. Investment management fees incurred by the Company were \$2,842, \$2,215, and \$1,878 in 2024, 2023 and 2022, respectively. As of December 31, 2024 and 2023, there were no amounts due to Securian AM under these agreements. These amounts are settled quarterly.

The Company also has agreements with SFS, an affiliated broker dealer, to distribute certain of the Company's individual life and annuity products. As of December 31, 2024 and 2023, the amount payable to SFS was \$158 and \$130, respectively. These amounts are settled quarterly. Commissions and fees incurred under these agreements totaled \$401, \$728, and \$984 for the years ended December 31, 2024, 2023 and 2022, respectively.

Notes to Statutory Financial Statements (Continued)

The Company has entered into agreements with Minnesota Life, whereby the Company may issue an individual life policy to certain individuals converting from a group life insurance policy issued by Minnesota Life or Minnesota Life may issue an individual life policy to certain individuals converting from a group life insurance policy issued by the Company. Upon issuance of the individual life policy, the Company either receives from or pays to Minnesota Life a conversion charge. For the years ended December 31, 2024, 2023 and 2022, the Company recognized \$318, \$1,191, and \$133 respectively, of expense charges from conversions, net of conversion income, which is recorded in general insurance expenses and other income, respectively, on the statements of operations. As of December 31, 2024 and 2023, the amount payable to Minnesota Life was \$55 and \$203, respectively. These amounts are settled quarterly.

Notes to Statutory Financial Statements (Continued)

(in thousands)

(9) Related Party Transactions (Continued)

The Company has entered into an agreement with Minnesota Life, whereby the Company assigns the rights to its profit commission from unrelated third party reinsurers based on its underlying mortality experience to Minnesota Life in exchange for a fixed percentage allowance based on the premium reinsured. For the years ended December 31, 2024, 2023 and 2022 under this agreement, the Company recognized income of \$7,569, \$13,628, and \$24,986 respectively, which is recorded in affiliated allowances on the statutory statements of operations. As of December 31, 2024 and 2023, the amount due from (to) Minnesota Life was \$(1,248) and \$2,128, respectively. These amounts are settled quarterly. Depending on the Company's mortality experience in any given year, the fixed percentage allowance received from Minnesota Life can be favorable or unfavorable in relation to the profit commission the Company has forgone from the unrelated third party reinsurer and assigned to Minnesota Life.

The Company purchases a percentage of ownership of newly originated mortgage loans from Minnesota Life. For the years ending December 31, 2024, 2023 and 2022 the Company purchased \$59,155, \$51,850, and \$59,700 respectively, of mortgage loans.

(10) Liability for Unpaid Accident and Health Claims, and Claim and Loss Adjustment Expenses

Activity in the liability for unpaid accident and health claims and claim adjustment expenses, which is included within accident and health policy reserves and policy claims in process of settlement on the statutory statements of admitted assets, liabilities and capital and surplus, is summarized as follows:

	2024		2023		2022
Balance at January 1 Less: reinsurance recoverable	\$	78,966 46,745	\$	75,719 45,037	\$ 70,654 40,705
Net balance at January 1 Incurred related to:		32,221		30,682	29,949
Current year		68,593		61,489	50,083
Prior years		(12,536)		(9,692)	(6,991)
Total incurred		56,057		51,797	43,092
Paid related to:					
Current year		45,613		38,456	28,161
Prior years		11,729		11,802	14,199
Total paid		57,342		50,258	42,360
Net balance at December 31		30,936		32,221	30,681
Plus: reinsurance recoverable		36,369		46,745	 45,037
Balance at December 31	\$	67,305	\$	78,966	\$ 75,718

As a result of changes in estimates of claims incurred in prior years, the accident and health claims and claim and loss adjustment expenses incurred decreased by \$12,536, \$9,692 and \$6,991 in 2024, 2023 and 2022, respectively. The remaining changes in amounts are the result of normal reserve development inherent in the uncertainty of establishing the liability for unpaid accident and health claims and claim and loss adjustment expenses.

Notes to Statutory Financial Statements (Continued)

(in thousands)

(11) Capital and Surplus and Dividends

Dividend payments by the Company to its parent cannot exceed the greater of 10% of statutory capital and surplus or the statutory net gain from operations as of the preceding year-end, as well as the timing and amount of dividends paid in the preceding 12 months, without prior approval from the Minnesota Department of Commerce. Based on these limitations and 2024 statutory results, the maximum amount available for the payment of dividends during 2025 by the Company without prior regulatory approval is \$54,624.

Other than noted above, there are no restrictions placed on the Company's unassigned surplus, including for whom the surplus is being held.

The Company did not receive a capital contribution for the year ended December 31, 2024. The Company received a capital contribution of cash from Minnesota Life in the amount of \$50,000 for the year ended December 31, 2023. The Company did not receive a capital contribution for the year ended December 31, 2022.

The Company is required to meet certain minimum risk-based capital (RBC) requirements, which are imposed by the respective state of domicile. The formulas within the RBC calculation were developed by the NAIC. The RBC requirements were designed to monitor capital adequacy and to raise the level of protection for policyholders. Companies that have an RBC ratio below certain trigger points are required to take specified corrective action. The Company exceeded the minimum RBC requirements for the years ended December 31, 2024 and 2023.

(12) Reinsurance

In the normal course of business, the Company seeks to limit its exposure to loss on any single insured and to recover a portion of benefits paid by ceding reinsurance to other insurance companies. To the extent that a reinsurer is unable to meet its obligations under the reinsurance agreement, the Company remains liable. The Company evaluates the financial condition of its reinsurers and monitors concentrations of credit risk to minimize its exposure to significant losses from reinsurer insolvencies. Allowances are established for amounts deemed uncollectible. At December 31, 2024 and 2023, policy reserves are reflected net of reinsurance ceded of \$204,369 and \$192,652, respectively.

Reinsurance is accounted for over the lives of the underlying reinsured policies using assumptions consistent with those used to account for the underlying policies.

The effect of reinsurance on premiums and annuity considerations for the years ended December 31 was as follows:

	2024			2023	2022	
Direct premiums and annuity considerations	\$	2,396,221	\$	2,116,628	\$	1,784,922
Reinsurance assumed		6,617		6,209		5,910
Reinsurance ceded		(1,447,168)		(1,292,352)		(1,169,667)
Total premiums and annuity considerations	\$	955,670	\$	830,485	\$	621,165

Reinsurance recoveries on ceded reinsurance contracts were \$1,139,300, \$1,084,682 and \$1,114,876 during 2024, 2023 and 2022, respectively.

The Company has entered into a reinsurance agreement with Minnesota Life as discussed in detail in note 9 which is included in the reinsurance ceded information above.

The Company had an Aggregate Stop Loss reinsurance program, in conjunction with Minnesota Life with a 125% Loss Ratio attachment point and \$110 million of available coverage capacity, through January 1, 2024. No reinsurance credit has been recorded for this program for the years ended December 31, 2024, 2023 and 2022.

Notes to Statutory Financial Statements (Continued)

(13) Commitments and Contingencies

The Company is involved in various pending or threatened legal proceedings arising out of the normal course of business. In the opinion of management, the ultimate resolution of such litigation will likely not have a material adverse effect on operations or the financial position of the Company.

As of December 31, 2024, the Company had committed to originate mortgage loans totaling \$12,000 but had not completed the originations.

As of December 31, 2024, the Company had committed to purchase corporate bonds totaling \$41,750, but had not completed the purchase transactions.

The Company is contingently liable under state regulatory requirements for possible assessments pertaining to future insolvencies and impairments of unaffiliated insurance companies. The Company records a liability for future guaranty fund assessments based upon known insolvencies, according to data received from the National Organization of Life and Health Insurance Guaranty Association. At December 31, 2024 and 2023, this liability was \$990 and \$764, respectively. An asset is recorded for the amount of guaranty fund assessments paid, which can be recovered through future premium tax credits. This asset was \$1,965 and \$88 as of December 31, 2024 and 2023, respectively. These assets are being amortized over a five-year period.

(14) Borrowed Money

The Company has entered into a membership agreement with the FHLB, providing an efficient way to set up a borrowing facility with access to low cost funding. The total borrowing capacity is dependent on the amount and type of Company assets. As of December 31, 2024 and 2023, the Company does not have any outstanding borrowings.

The Company pledged general account bonds with a carrying value and fair value of \$175,164 and \$157,138, respectively, as collateral for FHLB borrowings as of December 31, 2024. At that time, the Company had the capacity for either long-term or short-term borrowings of approximately \$134,167 without pledging additional collateral. If the fair value of the pledged collateral falls below the required collateral for the outstanding borrowed amount, the Company is required to pledge additional collateral. The carrying value and fair value of the maximum amount of general account collateral pledged to the FHLB during 2024 was \$179,213 and \$158,559, respectively.

As of December 31, 2024, the Company held FHLB Class A membership stock of \$1,784. FHLB stock is carried at cost and is recorded in common stocks on the statutory statements of admitted assets, liabilities and capital and surplus.

(15) Retrospectively Rated Contracts

The Company estimates accrued retrospective premium adjustments for its group and credit life and accident and health insurance business through a mathematical approach using an algorithm of the financial agreements in place with clients.

The amount of net premiums written by the Company at December 31, 2024 that are subject to retrospective rating features was \$8,846 which represented 2% of the total net premiums written for group and credit life and accident and health. No other net premiums written by the Company are subject to retrospective rating features.

Has Securian Life Insurance Company reinsured any risk with any other entity under a reinsurance contract contracts with the same reinsurer or its affiliates) that is subject to Appendix A-791, <i>Life and Health Agreements</i> , and includes a provision that limits the reinsurer's assumption of significant risks identified A-791?	Reinsurance
	Examples of risk-limiting features include provisions such as a deductible, a loss ratio corridor, a loss cap, limit or other provisions that result in similar effects.	
	If yes, indicate the number of reinsurance contracts to which such provisions apply:	Yes □ No 🗷
	If yes, indicate if deposit accounting was applied for all contracts subject to Appendix A-791 that limit signif	icant risks.
	Yes [□ No □ N/A 🗷
2.	Has Securian Life Insurance Company reinsured any risk with any other entity under a reinsurance contract contracts with the same reinsurer or its affiliates) that is not subject to Appendix A-791, for which accounting was applied and includes a provision that limits the reinsurer's assumption of risk?	
	Examples of risk-limiting features include provisions such as a deductible, a loss ratio corridor, a loss cap, limit or other provisions that result in similar effects.	an aggregate
		Yes 🗷 No 🗆
	If yes, indicate the number of reinsurance contracts to which such provisions apply:	1
	If yes, indicate whether the reinsurance credit was reduced for the risk-limiting features.	
	Yes [□ No □ N/A 🗷
	N/A as the reinsurance contract did not result in a reinsurance credit.	
3.	Does Securian Life Insurance Company have any reinsurance contracts (other than reinsurance contracts or state facility) that contain one or more of the following features which may result in delays in paymen fact:	
	 a. Provisions that permit the reporting of losses to be made less frequently than quarterly; b. Provisions that permit settlements to be made less frequently than quarterly; c. Provisions that permit payments due from the reinsurer to not be made in cash within ninety (90) settlement date (unless there is no activity during the period); or d. The existence of payment schedules, accumulating retentions from multiple years, or any features designed to delay timing of the reimbursement to the ceding entity. 	-
		Yes □ No 🗷

SECURIAN LIFE INSURANCE COMPANY Schedule of Supplemental Reinsurance Risks Interrogatories

December 31, 2024

4.	Has Securian Life Insurance Company reflected reinsurance accounting credit for any contracts that are not subject to
	Appendix A-791 and not yearly renewable term reinsurance, which meet the risk transfer requirements of SSAP No.
	61R?

Type of contract	Response:	Identify reinsurance contract(s)	Has the insured event(s) triggering contract cover been recognized
Assumption reinsurance – new for the reporting period	Yes □ No		N/A
Non-proportional reinsurance, which does not result in significant surplus relief	Yes □ No		Yes □ No □ N/A 🗷

5.	Has Securian Life Insurance Company ceded any risk, which is not subject to Appendix A-791 and not yearly renewable
	term reinsurance, under any reinsurance contract (or multiple contracts with the same reinsurer or its affiliates) during
	the period covered by the financial statements, and either:

a.	Accounted for that contract as reinsurance under statutory accounting principles (SAP) and as a deposit under
	generally accepted accounting principles (GAAP); or

Yes □ No 🗷 N/A □

a. Accounted for that contract as reinsurance under GAAP and as a deposit under SAP?

Yes	□ No	×	N/A	
-----	------	---	-----	--

If the answer to item (a) or item (b) is yes, include relevant information regarding GAAP to SAP differences from the accounting policy footnote to the audited statutory-basis financial statements to explain why the contract(s) is treated differently for GAAP and SAP below:
