NOTES TO FINANCIAL STATEMENTS

(1) Summary of Significant Accounting Policies

A. Accounting Practices

The accompanying statutory financial statements of Southern Pioneer Life Insurance Company (the Company) have been prepared in accordance with accounting practices prescribed or permitted by the Arkansas Insurance Department (AID). The AID recognizes statutory accounting practices prescribed or permitted by the state of Arkansas for determining and reporting the financial condition and results of operations of an insurance company and for determining its solvency under the Arkansas Insurance Law. Prescribed statutory accounting practices are those practices that are incorporated directly or by reference in state laws, regulations and general administrative rules applicable to all insurance enterprises domiciled in a particular state. Permitted statutory accounting practices include practices not prescribed by the domiciliary state, but allowed by the domiciliary state regulatory authority. The National Association of Insurance Commissioners' (NAIC) *Accounting Practices and Procedures* manual (NAIC SAP) has been adopted as a component of prescribed or permitted practices by the state of Arkansas. The state has adopted the prescribed accounting practices as stated in NAIC SAP, without modification. The Company has no material statutory accounting practices that differ from those of the state of Arkansas or the NAIC accounting practices.

D. Loan-Backed Securities

1. Prepayment assumptions for single class and multi-class mortgage-backed/asset-backed securities were obtained from Bloomberg when available. Other payment speed assumptions for a small number of holdings were reviewed with the appropriate affiliated company analyst by evaluating the underlying collateral.
2. There were no other than temporary impairments (OTTI) recorded as of March 31, 2016, due to management's intent to sell or inability to hold a security until recovery.
3. As of March 31, 2016, the Company did not hold any securities for which an OTTI has previously been recognized.
4. There were no impaired securities (fair value is less than cost or amortized cost) for which an OTTI has not been recognized in earnings as a realized loss (including securities with a recognized OTTI for non-interest related declines when a non-recognized interest related impairment remains) as of March 31, 2016:

	<u>Aggregate</u>	<u>Less than 12 months</u>	<u>12 Months or longer</u>
A. Gross Unrealized Losses	\$ -	\$ -	\$ -
B. Fair Value of Securities with Unrealized Losses	\$ -	\$ -	\$ -

5. In determining whether a decline in value is other than temporary, the Company considers several factors including, but not limited to the following: the extent and duration of the decline in value; the Company's inability or lack of intent to retain the investment for a period of time sufficient to recover the amortized cost basis; and the performance of the security's underlying collateral and projected future cash flows. In projecting future cash flows, the Company incorporates inputs from third-party sources and applies reasonable judgment in developing assumptions used to estimate the probability and timing of collecting all contractual cash flows.

(20) Fair Value Measurements

The fair value of the Company's financial assets and financial liabilities has been determined using available market information as of March 31, 2016. Although the Company is not aware of any factors that would significantly affect the fair value of financial assets and financial liabilities, such amounts have not been comprehensively revalued since those dates. Therefore, estimates of fair value subsequent to the valuation dates may differ significantly from the amounts presented herein. Considerable judgment is required to interpret market data to develop the estimates of fair value. The use of different market assumptions and/or estimation methodologies may have a material effect on the estimated fair value amounts.

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability (exit price) in an orderly transaction between market participants at the measurement date. In determining fair value, the Company primarily uses the market approach which utilizes prices and other relevant information generated by market transactions involving identical or comparable assets or liabilities. To a lesser extent, the Company also uses the income approach which uses discounted cash flows to determine fair value. When applying either approach, the Company maximizes the use of observable inputs and minimizes the use of unobservable inputs. Observable inputs reflect the assumptions market participants would use in valuing a financial instrument based on market data obtained from sources independent of the Company. Unobservable inputs reflect the Company's estimates about the assumptions market participants would use in valuing financial assets and financial liabilities based on the best information available in the circumstances.

The Company is required to categorize its financial assets and financial liabilities carried at fair value on the statutory statements of admitted assets, liabilities and capital and surplus according to a three-level hierarchy. A level is assigned to each financial asset and financial liability based on the lowest level input that is significant to the fair value measurement in its entirety. The levels of fair value hierarchy are as follows:

Level 1 – Fair value is based on unadjusted quoted prices for identical assets or liabilities in an active market. The types of assets and liabilities utilizing Level 1 valuations generally include money-market funds.

Level 2 – Fair value is based on significant inputs, other than quoted prices included in Level 1, that are observable in active markets for identical or similar assets and liabilities.

Level 3 – Fair value is based on at least one or more significant unobservable inputs. These inputs reflect the Company's assumptions about the inputs market participants would use in pricing the assets or liabilities. The types of assets and liabilities utilizing Level 3 valuations generally include certain non-exchange traded common stocks.

The Company uses prices and inputs that are current as of the measurement date. In periods of market disruption, the ability to observe prices and inputs may be reduced, which could cause an asset or liability to be reclassified to a lower level.

Inputs used to measure fair value of an asset or liability may fall into different levels of the fair value hierarchy. In these situations, the Company will determine the level in which the fair value falls based upon the lowest level input that is significant to the determination of the fair value.

NOTES TO FINANCIAL STATEMENTS

(20) Fair Value Measurements (Continued)

The following table summarizes the Company's financial assets and financial liabilities measured at fair value as of March 31, 2016:

	Level 1	Level 2	Level 3	Total

- Transfers of securities among levels occur at the beginning of the reporting period.
- The methods and assumptions used to estimate the fair value of financial assets and liabilities are summarized as follows:

Common stocks

The Company's common stocks consist of investments in non-exchange traded common stock classified within Level 3.

Short-term investments

Short-term investments include money market instruments and highly rated commercial paper. Money market instruments are generally valued using unadjusted quoted prices in active markets and are reflected in Level 1.

- Not applicable – no derivative assets or liabilities.
